PROJECTS

Zeph Finance Tracker **JavaScript, React, Vite, Tailwind CSS, Netlify**

- Built a personal finance tracking app to help users view their income and daily expenses.
- Wrote custom logic to process user input, categorise transactions, and accurately update financial balances in real-time.
- Designed a clean, responsive layout so users can easily view their financial data across devices.

TuttiFrutti (In Development) **Next.js, React, Supabase, Tailwind CSS, Netlify**

- Building a new ecommerce website to speed up and make shopping easier for customers.
- Connected a secure database to easily manage product listings and customer data.

World Cup Simulator 2026 **JavaScript, React, Vite, Tailwind CSS, Netlify**

- Created a tournament simulator using custom algorithms to predict the 2026 World Cup.
- Wrote the core logic to calculate match results, update team standings, and automatically progress teams through the knockout stages.
- Built a responsive interface so users can view and track real-time stats through the tournament.

Campus Quest **Next.js, React, Mapbox GL JS, AWS S3, Vercel**

- Built a mobile friendly web app to help students find their way around the TUD Blanchardstown campus.
- Integrated interactive 3D maps to provide clear, accurate walking directions between buildings.
- Set up a searchable database so users can quickly check the specific facilities available in each building.

RF Motors **PHP, CSS, MySQL**

- Created a full stack car rental app that lets users browse cars, make and manage their bookings.
- Built a secure backend to handle user logins and keep account sessions private.
- Styled a responsive frontend layout to make the browsing and booking process straightforward for users.

Calculator App **Java, Swing**

- Built a fully functional desktop calculator app.
- Created a clean graphical interface so the app is intuitive and easy to use.
- Wrote the logic to accurately handle basic maths, percentages, negatives and square roots.

ACHIEVEMENTS & CERTIFICATES

Notion Dublin AI Week Hackathon 2026 – 3rd Place
Cursor Hackathon Dublin 2026
Dell STEM Aspire Mentee 2025-2026

- Learning Java 11
- GitHub Foundations
- Introduction to Artificial Intelligence
- Introduction to Prompt Engineering for Generative AI
- SymfonyCasts PHP Course

SKILLS & INTERESTS

Languages: Java, JavaScript, Python, CSS, SQL
Frameworks & Tools: Next.js, React, Node.js, Tailwind CSS
Databases & Backend: Supabase, AWS S3, MongoDB, MySQL
DevOps Tools: GitHub, Git, Vercel, Netlify
CS Fundamentals: Data Structures & Algorithms, Software Development & Testing, DevOps, Systems Design
Interests: Football, Gym, Travelling, Music
